

Celosia

We have an excellent range of cut flower Celosia, from the traditional cristata and plumosa types through to exciting new colours and forms in the Bombay series.

Celosia Bombay QFP®

We have been associated with Celosia Bombay for a number of years. Our enthusiasm and excitement for this seed crop has never diminished. Bombay is a superb "up market" variety with round stems, flat combs, new appealing colour's and truly uniform growth.

The new Bombay series can give higher planting density to 80 plants per m², due to greater disease resistance, strong stems especially at neck of stem and shorter well spaced leaves.

NEW Releases - Exclusive to GHP
