

Philadelphus

Snow White Fantasy® Philadelphus is a improved selection from 'Virginal' and is designed for the cut flower market.

Best picked in the mature bud stage for ease of handling, before the double white flowers appear.

Snow White Fantasy® is a quick growing deciduous shrub, that can withstand cold winters and can be grown successfully throughout New Zealand. Any average soil conditions will suit. As Philadelphus are vigorous growers, attention to pruning after flower harvest is essential to produce the next season's quality stems. A hard prune is required.

Particular attention should also be given to Post Harvest treatment.

Philadelphus Snow White Fantasy®

Free flowering. Splendid white flowers in early summer.
From Koster BV - non propagation agreement
