

## Symphoricarpos Fantasy® series

Symphoricarpos are very much in demand for the use of berries in floral arrangements. Easy to grow in New Zealand in all soil types.

- **Colours.** The coloured berries of the new types produce berries right down the stems, which look spectacular. Colours available are white, cream, green, red and pink.
- **Pollination.** The white variety 'White Pearl Fantasy®' needs to be used as a pollinator for all of the other colours so you can either plant one white to every 10 of another colour or plant 1 row of white amongst the other colours. Bees work the flowers to pollinate, so it is important that bees are operating in your area.
- **Spacing.** 1 metre apart for two rows then a tractor gap of two to three meters then two more planted rows with the plants 1 metre apart.

### **Symphoricarpos Bright Fantasy®** **(Bokrabright PVR protection)**

A new white snowberry. Easy to harvest, with a long cutting period. From Kolster BV - non propagation agreement.  
QFP®

### **Symphoricarpos Charming Fantasy®** **(Kolcharm PVR protection)**

A new pink snowberry, with early upright growth and a very long harvest period.  
From Kolster BV - non propagation agreement  
QFP®

### **Symphoricarpos Greenpearl Fantasy®** **(Kolgreep PVR protection)**

A very unusual colour. Berries have a greenish hue.  
From Kolster BV - non propagation agreement  
QFP®

### **Symphoricarpos Pink Pearl Fantasy®**

Pinkish white berries. Planting a pollinator nearby is recommended.

From Kolster BV - non propagation agreement

### **Symphoricarpos Sweet Fantasy® (Kolsweet)**

A new upright growing snowberry, with a distinct colour.

From Kolster BV - non propagation agreement

### **Symphoricarpos White Pearl Fantasy®**

A late white snowberry, which is also an especially good pollinator for the pink varieties.

From Kolster BV - non propagation agreement
