

## Weigela

The two new Weigela varieties from Kolster in the Netherlands offer something really special as cut foliage. The Weigela are very easy to grow, fully frost hardy and deciduous.

- **Vase life.** They have an excellent vase life.
- **Spacing.** Plant spacing is 1 metre apart either way for two rows then a tractor gap, then two more rows across the paddock.
- **Harvesting.** From time of planting to first harvest would be around 18 months, depending on planting time. Harvest time is from late spring/early summer right through to late autumn.

### **Weigela Sparkling Fantasy®** **(Bokraspark<sup>PVR</sup> protection)**

Very beautiful shining red/brown leaves with a yellow vein.  
You can not get a better bronze leaf foliage crop.  
From Kolster BV - non propagation agreement  
QFP®

### **Weigela Sunny Fantasy®** **(Kolsunn<sup>PVR</sup> protection)**

A new selection with big, almost white variegated leaves. The most beautiful variegated selection. A long harvest period and good vase life.  
From Kolster BV - non propagation agreement
